OUR POSITION

The New Era has for times past been looked upon by some who did not agree with the views and policies of the paper as a mouthpiece for the people on various questions. Always, legitimate criticism has been heard, but now, when it is called for, it cannot be denied that there is no such thing as criticism. As a matter of fact, no one of the many criticisms which have been directed against the New Era has been without some justification. It is true that the paper has at times been very much in the public eye, and it has been accused of being too aggressive. But this is to be expected in any period of intense public interest. The New Era is under the present editor of the New Era and is for the benefit of what is called a "fair press." It is to be hoped that the New Era will continue to be a mouthpiece for the people on various questions.

The New Era has been in existence for some time, and it is expected to continue to exist as long as there is a demand for a newspaper that will give the people a full report of the news of the day. The New Era has always been a newspaper that has been in the public eye, and it has been accused of being too aggressive. But this is to be expected in any period of intense public interest. The New Era is under the present editor of the New Era and is for the benefit of what is called a "fair press." It is to be hoped that the New Era will continue to be a mouthpiece for the people on various questions.
